## 3. VENUE

### Donauwörth - Genderkingen airfield

An der Forstmahd 1  
86682 Genderkingen  
Germany

**The event organiser retains the right of access over the entire event site for the full duration of the event in respect of set-up, the period of the event, and dismantling.**

## 4. EVENT DATE

**Event duration:** 09. - 11.09.2022

### Opening times

Friday, 09.09.2020	from 9.00 am to 6.00 pm
Saturday, 10.09.2020	from 9.00 am to 7.00 pm
Aftershow-Party	from 8.00 pm to 1.00 am
Sunday, 11.09.2020	from 9.00 am to 5.00 pm

# FAIR REGULATIONS

Page 2 of 5

## 5. START OF SET-UP

From Tuesday 06.09.2020 to Thursday 10.09.2020 from 9.00 am to 7.00 pm  
Longer set-up times are only possible with permission of the Fair management.

## 6. CLOSE OF REGISTRATION

31.05.2022

**The areas available are allocated when registrations are received.  
Exhibitors at previous JetPower Fairs have priority over new exhibitors.**

## 7. SUPERVISION

The event organiser is responsible for the general supervision of the site and the Fair marquee, but has no obligation of care concerning stands and goods.  
The exhibitor himself is responsible for the supervision of his stand, especially during the set-up and dismantling periods, including objects in the open-air areas and the parking areas provided.

## 8. EXHIBITOR PASSES

Access to the Fair site is only granted to persons carrying exhibitor passes provided by the event organiser. These are valid exclusively for the exhibitors, stand staff and team pilots specifically named on them!  
Passes are not transferrable.

## 9. APPROVED TYPES OF SALES GOODS (GOODS INDEX)

The goods to be exhibited must conform to the goods index as stated in the constitution of the **Jets & Props** fair (no drones, no toys).

## 10. STAND AREA, DIRECT SALES, ADVERTISING

General permission is granted for direct sales of goods produced by this branch of the model industry, also of goods produced in-house by low-volume manufacturers.

Sub-letting of the hired stand area is not permitted (exception: registered joint stands).

# FAIR REGULATIONS

Page 3 of 5

Sales must **not** be accompanied by promotional methods which might alter the character of the event. This includes the use of microphones and loudspeakers. Hospitality stands, raffles and competitions are not permitted.

Advertising may only be displayed in or at the exhibitor's stand, or using the advertising spaces designated for the purpose on the site of **Jets & Props**. These are available at extra cost. It is prohibited to distribute printed matter of any kind outside the exhibitor's stand, including the designated parking areas.

At his discretion the event organiser may grant an exceptional permit in individual cases. Written application is required.

## 11. FAIR STAND DESIGN AND FITTINGS, MISCELLANEOUS

The event is intended to be a high-quality exhibition with the character of a Fair, and to this end each stand is required to conform to the following minimum standards:

1. Each exhibitor must provide clear separation for his stand area, using whatever means he prefers. These measures are to include back and side walls, and may consist of rigid walls, fabric panels or banners. Rigid walls can be ordered at the time the stand is booked.
2. Goods should be sold over a sales counter. If necessary, the counter can also be ordered at the time the stand is booked. Suitably covered beer table sets may also be used.
3. If the stand is open, it is fundamentally essential to provide a floor covering for the stand area. Simply laying sales goods on the wooden floor does not conform to the high-quality character of the Fair which is our aim.
4. It is not permitted to display sales stands and flipcharts outside the stand area.
5. Adequate stand lighting should also be provided.
6. If an exhibitor cannot supply his own Fair stand and fittings, we can offer a complete or partial ready-made stand. Details are shown on the registration form, which also lists the options and prices.
7. If copies of copyright material are to be available at the Fair stand, a relevant permit must be obtained. Fees, e.g. to GEMA (German copyright association), are payable by the exhibitor.
8. Exhibitors must keep valuable and easily transportable objects under lock and key outside the opening times of the exhibition marquee.
9. The exhibition stand must be left in a clean state at the end of each day. The exhibitor is responsible for disposal of packaging materials and waste of all kinds. Either take the waste materials with you, or take it to the collection points provided on the Fair site. When you register for a stand we will charge a one-time **waste disposal fee of € 12 per stand**, which must be pre-paid together with the stand fee. There is no need to sort the waste material.
10. The power supply in the exhibition marquee is switched off by Security after the Fair closes each evening. Overnight charging of batteries and the use of other mains-powered equipment at night is not possible. Please remember this point!

We trust that you will join us in ensuring that the new **Jets & Props** displays a professional image to our visitors, as this will in turn mean greater success for you.

## 12. FLIGHT DISPLAYS, FLYING SLOTS

The planning and execution of the company slots and display flying slots are the responsibility of the event organiser and his team. The Manufacturer Flight Show is planned as follows: All model manufacturers (no accessory manufacturers) registered by 31.05.2022 will be allocated company slots. It is essential to observe the final registration date for the Fair stand, because the size of the booked stand area has a direct influence on the duration of all flight slots. The available time frame for the Manufacturer Flight Show is from 10.00 am to 6.00 pm, minus buffer time and display flying interludes. After close of registration the Fair management team will calculate a factor based on the booked stand area and the available time frame. This factor, combined with the booked stand area, decides the duration of the individual company slots.

To ensure that no delays of any kind occur at the flightline, the Flightline Director and his assistants are instructed to keep strictly to the allocated flight times. Delays at take-off due to late appearance of the pilots or non-functioning technology do not extend the slot. The take-off times will be announced with ample notice. If a pilot significantly exceeds his allocated flight time, and does not conform to the Flightline Director's landing instructions, he will forfeit his slot on the following day.

These strict rules will guarantee that the manufacturer slots are completed smoothly and fairly.

**Only 2.4 GHz** radio control systems are permitted for use in all flying displays, company slots and display flight slots.

**All** models which are registered by exhibitors for a flying slot will be subjected to a visual **technical and electronic inspection** by a competent official designated by the event organiser. Models which are not presented for this examination before flying will not be permitted to take off. All models which clearly have a take-off weight of more than 25 kg will be subjected to a weight check before flying. The event organiser will make suitable weighing equipment available at the flightline, together with a trained individual who will determine the model's exact take-off weight.

If a model is registered for flying whose take-off weight is more than 25 kg, an appropriate **valid approval certificate** and the **necessary insurance** must be available for inspection.

Foreign **approval and insurance certificates** are acceptable and will be recognised, provided that they apply to models weighing more than 25 kg or a lesser minimum. However, pilots must be resident in the country in which the approval is issued, e.g. a German citizen is not permitted to fly a model with a French approval certificate.

Caution: many insurance policies apply only to models weighing less than 25 kg. Check beforehand, and extend your insurance protection if necessary.

## 13. DEPOSIT AND DISMANTLING

When you collect the Exhibitor documents from the Fair office we will require a **deposit of 200 € per stand**; this can be lodged in cash or by credit card.

**The deposit will be repaid if the stand is left in a clean state on the Sunday. If the exhibitor clears and leaves the stand before the end of the event, the organiser will retain the deposit, and the exhibitor will be excluded from participation in future Jets & Props Fairs.**

**The event ends on Sunday at 5 p.m.**

Goods must not be removed, and the stand must not be dismantled in whole or in part, before the conclusion of the event.

The exhibition area is to be cleared by **6.00 pm on Monday 12.09.2022 at the latest**. It must be returned in the condition in which it was accepted.

All traces of carpet tape and adhesive must be removed.
